

Open Labware: Build your own lab equipment using 3D printing and basic electronics

June 28th – July 8th 2017,
Dept. Physiology, University of Ibadan, Nigeria

Application Deadline 27th February 2017. Apply at <https://goo.gl/forms/IQCCVrVgai9BtVe22> or www.TReNDinAfrica.org

Eligibility: We only accept group applications from any country within Africa or from Germany. A group consists of three (3) members, all of whom have to be based at the same or nearby University or research institution. Each individual candidate may only feature in one group application. MSc to Professor eligible.

Description: Successful groups will build their own fully functioning 3D printer during the course and receive basic training in their use and maintenance. In addition, we will provide training in the use of modern electronics and microcontrollers and provide each individual candidate with an Arduino starter kit.

We will also cover:

- Return plane tickets from a major airport in your country (within Africa or Germany) to Ibadan
- Accommodation for the entire 2 weeks including breakfast. Other meals are not covered.
